REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance: Applicants have amended claim 1 to require that the wall directly opposite to the substrate in the reactor be directly cooled. The closest art of record was cited in the first office action. USP 4,047,496 was relied upon to show the feature of directly cooling an inside wall of a reactor. However, this reference does not disclose directly cooling wall 31 shown in the figure 1 and elsewhere which is the wall directly opposite the substrate. Furthermore, USP 4,047,496 provides no motivation to directly cool wall 31 in that said wall is transparent to the radiant energy used to heat the substrate and therefore remains unheated and the direct cooling system disclosed in USP 4,047,496 is used only to cool the block housing the lamps so that the apparatus does not overheat and not to "directly" cool wall 31.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
